#### **FOREWORD**

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

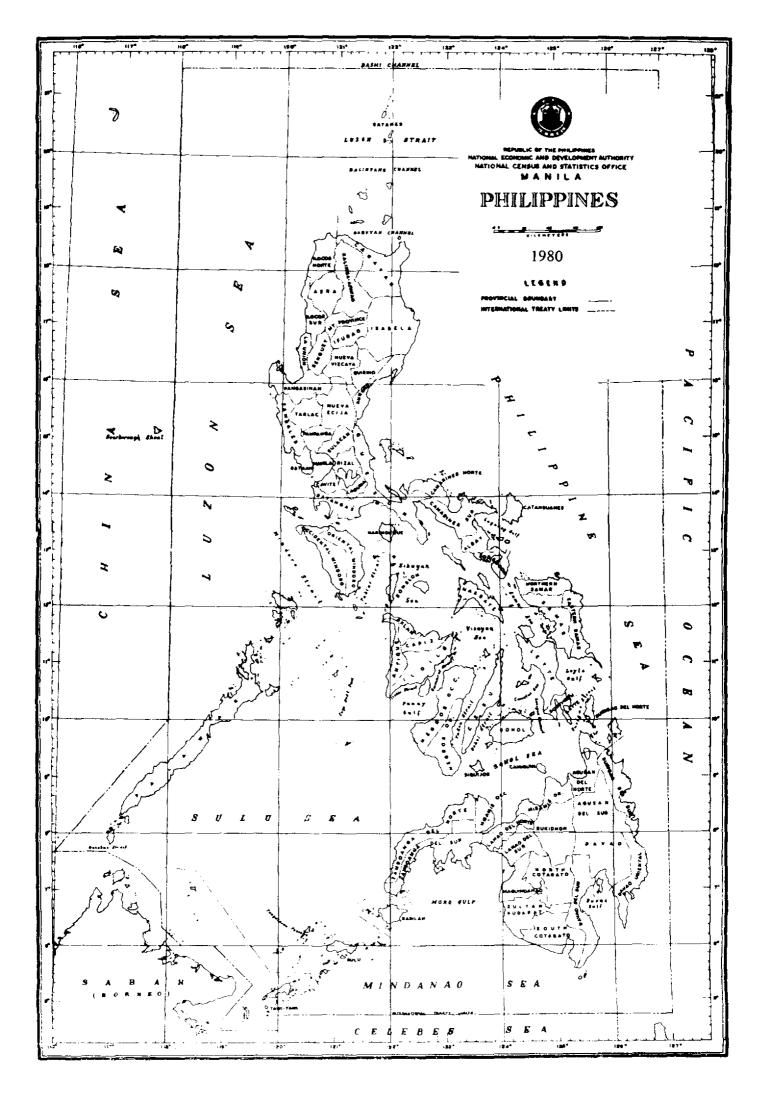

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

## **Explanatory Text**

#### **GENERAL**

#### INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households at well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables I to 4 of the population tables refer to total population, that is, the population of the private nouseholds plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

#### **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every censal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

## INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippine Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

## **CENSUS BOARDS**

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) ar 1 the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Fronomic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

#### **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

#### METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

## PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

#### POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

#### CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items

Type of Building
Type of Occupancy

Sex Type of Occupancy
Marital Status Construction Materials of Roof and Outer

Walls

Highest Grade Completed Year Built

Literacy Floor Area of Dwelling Unit

Language/Dialect Spoken in the Household Tenure of Owner-Occupant with Respect to the Land

Gainful and Non-Gainful Occupation Kind of Lighting Facilities

Major and Minor Industry

Use and Source of Water Supply

Migration

Type of Toilet Facilities

Kind of Cooking Fuel Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

## **DEFINITION OF TERMS AND CONCEPTS**

#### I - POPULATION

## **BARANGAY**

Age

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

#### **ENUMERATION AREA**

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

#### **URBAN AND RURAL AREAS**

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - 1) A town hall, church or chapel with religious services at least once a month;
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week:
    - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

## PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- .0. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 1. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

#### PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

#### USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

#### HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

## PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months or the day of enumeration, are likewise not counted as part of the institutional population.

#### RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

## LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

#### **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the hou shold is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

#### RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head

## AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980, was prepared for the use of enumerators, editors/coders and verifiers.

#### **MARITAL STATUS**

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

## **CITIZENSHIP**

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

## LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

## HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

#### **USUAL OCCUPATION**

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

#### **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

## **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

#### II - HOUSING

#### BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

## The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial — a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

## **DWELLING UNIT**

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

## **CONSTRUCTION MATERIALS OF ROOF**

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

## CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

#### YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

## NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least 1 s an area of 3 square meters.

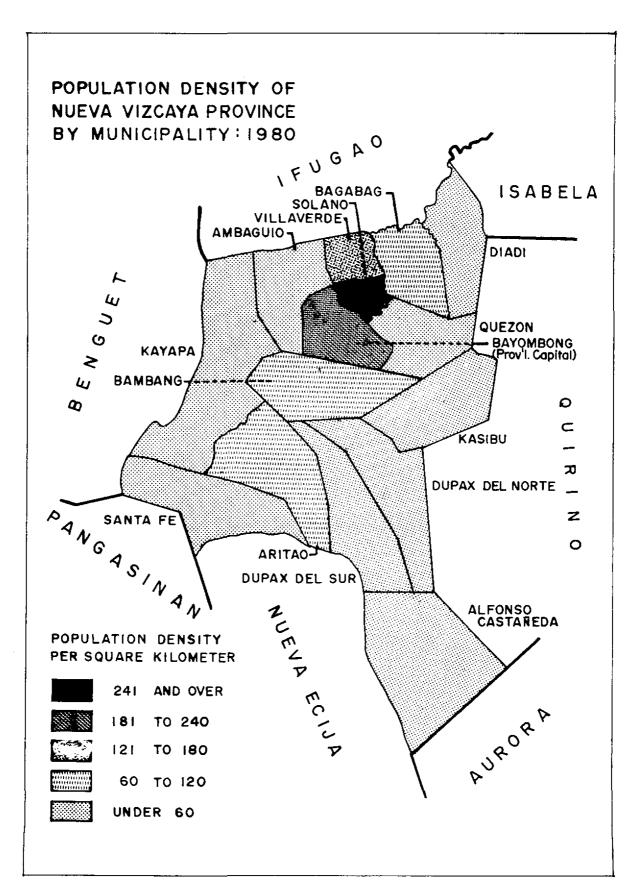

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

## FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Area of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway was excluded in determining the floor area.

## Nueva Vizcaya: A Brief Analysis

The province of Nueva Vizcaya is bounded by Ifugao and Isabela on the north and northeast, Quirino and Aurora on the east and southeast, respectively, Nueva Ecija on the south, and Benguet and Pangasinan on the west.

The province is rugged and mountainous with elevations rising as high as 1,500 meters. Vast virgin forests and timber resources characterize its eastern portion near the boundary of Aurora. Its developed areas are the valleys situated along the main highways connecting Central Luzon to Cagayan Valley. The province, with a land area of 3,903.9 square kilometers, constitutes 1.3 percent of the total land area of the Philippines and is the fourth largest of the seven provinces in Region II.

Nueva Vizcaya is presently composed of 13 municipalities and two municipal districts with Bayombong as the provincial capital.

#### **POPULATION**

Nueva Vizcaya's population on May 1, 1980 totalled 241,690 representing an increase of 28,539 or 13.39 percent since 1975. Annual geometric growth rate of the population during the 1975-1980 intercensal period averaged 2.54 percent. Correspondingly, the population density between 1975 and 1980 increased considerably from 54.6 to 61.9 inhabitants per square kilometer.

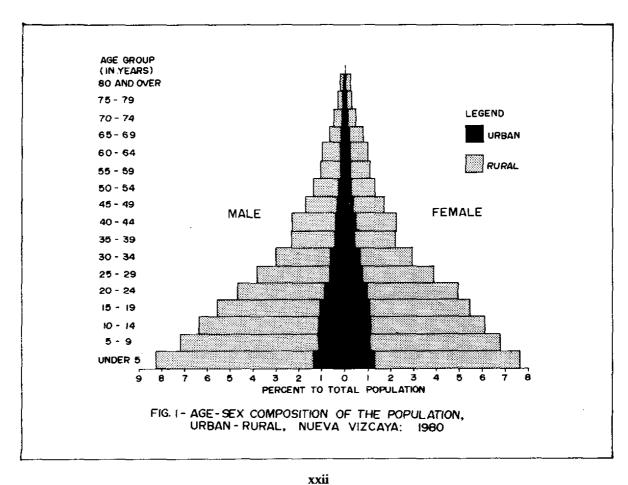

The province is still predominantly rural although the proportion of urban population has increased from 16.25 in 1975 to 18.73 percent, while rural population has decreased from 83.75 to 81.27 percent.

The proportion of male urban residents rose from 8.06 percent to 9.25 percent or an increase of 1.19 percentage points from the previous proportion. The same trend applies to the female population with the proportion of urban residents increasing from 8.19 percent to 9.48 percent and that of rural residents decreasing from 41.13 percent to 39.80 percent (Table 2).

Table A shows the distribution of the population by sex in urban and rural areas in 1975 and 1980:

# TABLE A — URBAN-RURAL POPULATION BY SEX, NUEVA VIZCAYA: 1975 AND 1980

Area Classification and Sex	19	80	1975		
	Number	Percent	Number	Percent	
Total	241,690	100.00	213,151	100.00	
Male	122,579	50.72	108,022	50.68	
Female	119,111	49.28	105,129	49.32	
Urban	45,270	18.73	34,627	16.25	
Male	22,346	9.25	17,169	8.06	
Female	22,924	9.48	17,458	8.19	
Rural	196,420	81.27	178,524	83.75	
Male	100,233	41.47	90,853	42.62	
Female	96,187	39.80	87,671	41.13	

Of the total population, 122,579 were males and 119,111 were females, or a sex ratio of 102.91, practically the same sex ratio registered in 1975 (102.75). The rural population, with a sex ratio of 104.21, slightly exceeded the sex ratio of the province. In urban areas, however, the females prevailed over the males with a sex ratio of 97.48, lower by 0.86 than the 1975 urban sex ratio of 98.34 (Table 2).

Figure 1 shows the 1980 proportions of males and females to the total population, urban and rural, in five-year age groups. Except for a negligible increase in the proportion of persons aged 40-44, the rural sector come close to having a pyramidal population structure characterized by a declining percentage of males and females as each group increased in age. Deviations from the pyramid configuration occur more frequently in the urban population.

## AGE COMPOSITION

Changes in the population distribution by age from 1975 to 1980 paralleled those during the 1970-1975 period, but differed in degree. The proportion of children 14 years of age or younger fell from 44.45 to 42.53 percent, 0.42 percentage point lower than the decline in 1970-1975. The proportion of persons in the productive age group (15-64 years old) failed to match its prominent increase in 1970-1975, as it slowly hiked to 53.97 percent. The same trend was observed for adults 65 years and over with 3.50 percent.

Shown below is the broad-age structure of the population since 1970:

TABLE B -- AGE COMPOSITION OF THE POPULATION, NUEVA VIZCAYA: 1970, 1975 AND 1980

Age	19	80	1975		1970	
Composition	Number	Percent	Number	Percent	Number	Percent
Total	241,690	100.00	213,151	100.00	172,198	100.00
0 - 14 years	102,792	42.53	94,749	44.45	80,569	46.79
15 - 64 years	130,429	53.97	112,084	52.59	86,927	50.48
65 years and over	8,469	3.50	6,318	2.96	4,702	2.73

The median age of the population has risen from 16.10 to 17.22 years, an indication that the province is progressively growing older. This is coupled by a 1.57 increase in its aged-child ratio or the number of elderly for every 100 children, from 6.67 in 1975 to 8.24.

Due to a slight increase in the proportion of persons 15-64 years old, the dependency ratio decelerated by 4.87, from 90.17 dependents in 1975 to 85.30 in 1980. Urban and rural dependency ratios varied considerably. Of the urban population, 38.52 percent are 0-14 years old; 56.70 percent, 15-64 and 4.78 percent, 65 years and over, resulting in a dependency ratio of 76.37. In contrast, the rural population reached a dependency ratio of 87.49 with 43.45 percent under 15 years of age; 53.34 percent, 15-64 years old and 3.21 percent, 65 years and over.

## **MARITAL STATUS**

Since 1970 the proportion of married individuals had consistently exceeded all the other marital status categories of the population 10 years old and over. In 1980 married individuals totalled 52.26 percent, gaining 3.45 percentage points over the 1975 figure (48.81%). The proportion of the never married abruptly dropped by 4.12 percentage points to 42.99 percent, reversing the trend between 1975 (47.11%) and 1970 (46.78%). The widowed and the divorced or separated both increased to 4.14 percent and 0.51 percent, respectively. Those who did not bare their marital status made up 0.10 percent.

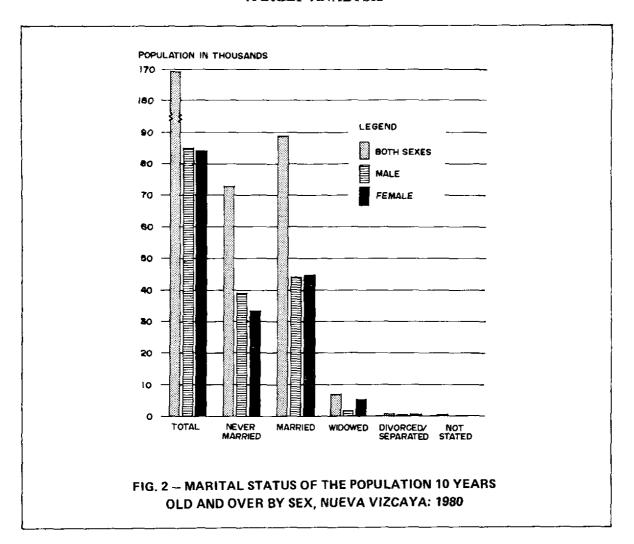

The proportions of the never married and the married varied considerably for both sexes. Of the males 45.94 percent were single and 51.51 percent were married while among the females 40.00 percent were single and 53.02 percent, married. Females more likely lost their mates either through death, divorce or separation than males. Of the 84,138 females, 6.21 percent were widowed and 0.64 percent, divorced or separated compared with 2.10 and 0.37 percent, respectively, for the males.

The succeeding table classifies the population 10 years old and over by sex and marital status in the last three censal years:

TABLE C — POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, NUEVA VIZCAYA: 1970, 1975 AND 1980

Sex and Marital Status	19	80	1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Both Sexes	169,174	100.00	148,053	100.00	116,312	100.00
Never married	72,719	42.99	69,742	47.11	54,412	46.78
Married	88,412	52.26	72,259	48.81	56,791	48.82
Widowed	7,011	4.14	5,425	3.66	4,579	3.94

Not stated	107	0.13	33	0.05	47	0.08

#### HIGHEST GRADE COMPLETED

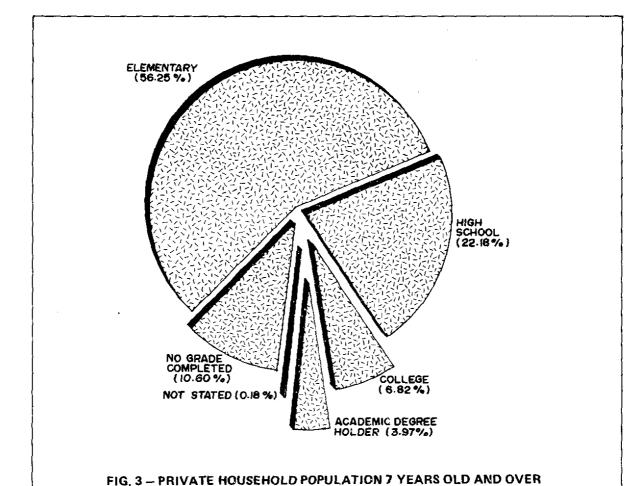

More persons attended school during the last five-year period, thus reducing the proportion of individuals with no formal education to a little more than one-tenth (10.60%) of the private household population 7 years old and over. Those who attended elementary school slightly declined to 56.25 percent, an indication that the proportion of persons ending up with higher educational attainment correspondingly increased. Those who attended high school went up to 22.18 percent and persons continuing up to college, to 6.82 percent. Academic degree holders likewise, rose from 3.01 to 3.97 percent. Those who did not state their highest educational attainment comprised 0.18 percent.

Of those having elementary training, 37.31 percent finished any of the first to third grades; 17.23 percent, the fourth grade; 13.13 percent, the fifth grade; and 32.33 percent, the sixth or seventh grade. Majority of those schooled until the secondary level did not go past the junior year (65.13%) while 34.87 percent graduated from high school. More than four-fifths of all college undergraduates (83.00%) attended the first to the third year and 17.00 percent, fourth year or higher (Table 5).

The following table gives the distribution of the private household population 7 years old and over by highest grade completed in 1975 and 1980:

# TABLE D -- PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, NUEVA VIZCAYA: 1975 AND 1980

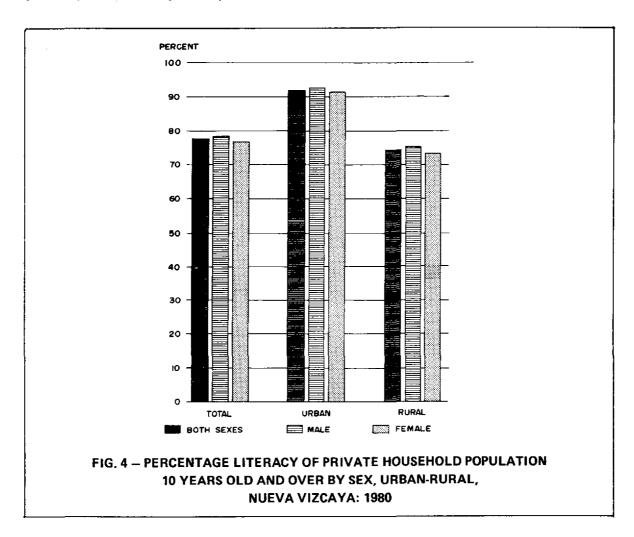

Highest Grade Completed	19	80	1975		
	Number	Percent	Number	Percent	
Total	189,008	100.00	166,825	100.00	
No grade completed	20,045	10.60	22,029	13.20	
Elementary grade	106,319	56.25	95,027	56.96	
High school	41,921	22.18	33,660	20.18	
College	12,882	6.82	8,234	4.94	
Academic degree holder	7,500	3.97	5,024	3.01	
Not stated	341	0.18	2,851	1.71	

BY HIGHEST GRADE COMPLETED, NUEVA VIZCAYA: 1980

## **LITERACY**

The rate of literacy for the private household population 10 years old and over stood at 77.63 percent (Table 6). Literate males constituted 39.37 percent and literate females, 38.26 percent. As may be expected, the urban areas had a higher literacy rate (91.93%) than the rural areas with only 74.12 percent. The urban population had more literate females (46.88%) than literate males (45.05%); however, the reverse was true among rural males (37.97%) and females (36.15%).

#### LANGUAGE OR DIALECT

A wide variety of languages and dialects (more than 37) are generally spoken by the 45,029 households in the province, but Ilocano predominates in most municipalities. On the whole 67.01 percent of the total households speak Ilocano. Trailing far behind are Ifugao (5.30%), Tagalog (5.21%), Inibaloi (4.90%), and Gaddang (2.35%). Seventy percent (70.00%) of the urban households speak Ilocano; 13.31 percent, Tagalog; and 11.31 percent, Gaddang. In rural areas, Ilocano is spoken by 66.33 percent; Ifugao, 6.41 percent; Inibaloi, 6.00 percent; Tagalog, 3.39 percent and Kangkanai, 1.26 percent.

#### GAINFUL OCCUPATION

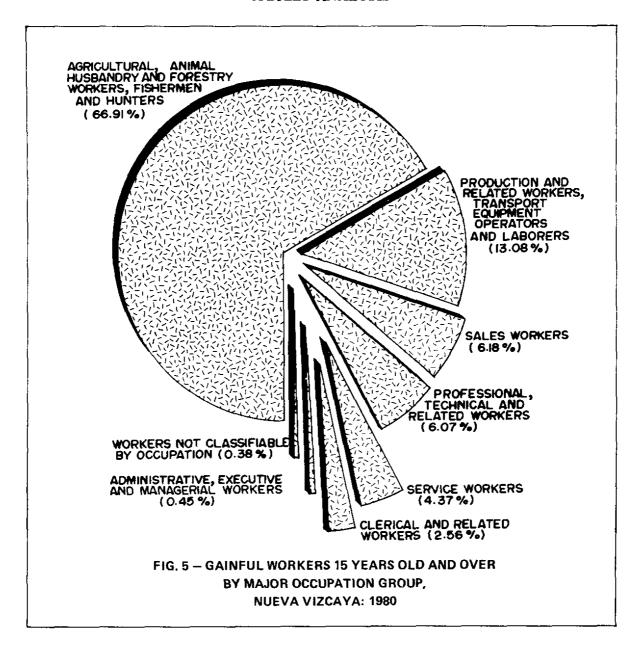

Of the private household population 15 years old and over, 69,113 persons are with gainful occupation, higher by 15.35 percent than the 59,915 persons in 1975. Gainful employment is heavily dominated by males (80.20%); barely 19.80 percent of all gainful workers are females.

The largest major occupation group is composed of agricultural, animal husbandry and forestry workers, fishermen and hunters. While they account for 66.91 percent, however, the proportion has decreased by 0.27 percentage point since 1975. Although remaining second, the proportion of production and related workers, transport equipment operators and laborers likewise, fell from 13.14 to 13.08 percent. Meanwhile, the proportion of sales workers hiked from 5.77 to 6.18 percent; professional, technical and related workers, from 5.16 to 6.07 percent; service workers, from 4.23 to 4.37 percent and clerical and related workers, from 2.33 to 2.56 percent. On the other hand, the proportion of administrative, executive and managerial workers dropped from 1.12 to 0.45 percent and workers not classifiable by occupation, from 1.07 to 0.38 percent.

TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, NUEVA VIZCAYA: 1975 AND 1980

Major Occupation Group	19	80	1975		
	Number	Percent	Number	Percent	
Total	<u>69,113</u>	100.00	59,915	100.00	
Professional, technical and					
related workers	4,195	6.07	3,091	5.16	
Administrative, executive and					
managerial workers	314	0.45	675	1.12	
Clerical and related workers	1,772	2.56	1,394	2.33	
Sales workers	4,269	6.18	3,459	5.77	
Service workers	3,018	4.37	2,534	4.23	
Agricultural, animal husbandry and forestry workers, fish- ermen and hunters	46,240	66.91	40,249	67.18	
Production and related workers, transport equipment opera-	10,210		ŕ		
tors and laborers	9,043	13.08	7,871	13.14	
Workers not clasifiable by occupation	262	0.38	642	1.07	

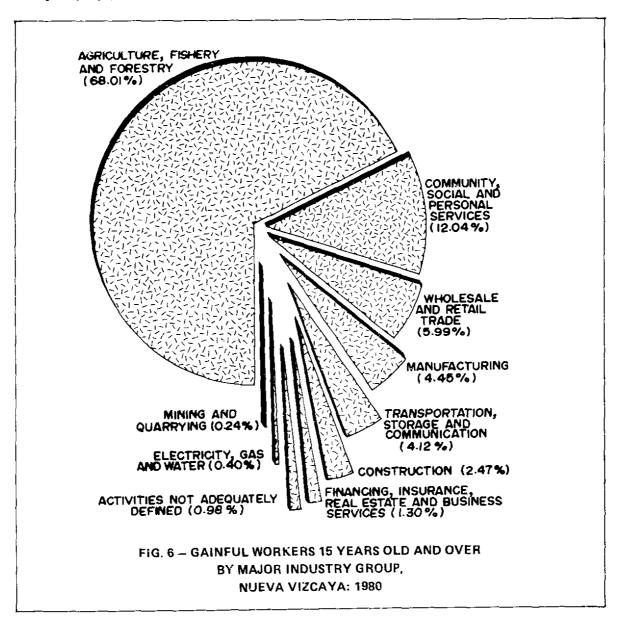

## INDUSTRY

Agriculture, fishery and forestry – the single largest major industry group – register 68.01 percent of the total gainful workers. Producers of agricultural crops heavily dominate the group, making up 93.62 percent. Only 4.02 percent are in forestry; 1.35 percent, in agricultural services and 0.78 percent, in the production of livestock, poultry and other animals. The industry group involving community, social and personal services provides jobs to 12.04 percent. Workers in this industry group tend to concentrate in three sectors: education services (34.12%), personal and household services (29.80%), and public administration and defense (19.06%). Wholesale and retail trade constitute 5.99 percent with the gainful workers engaged mainly in retail trade (91.40%) and the rest in wholesale (8.60%). Manufacturing employs 4.45 percent with the workers mostly engaged in the

manufacture of wood and wood products, including furniture and fixtures (57.46%); the manufacture of textile, wearing apparel and leather (19.76%); and of food, beverages and tobacco (13.45%). Four percent (4.12%) of the gainful workers are into transportation, storage and communication; 2.47 percent, in construction and 1.30 percent, in financing, insurance, real estate and business services. Electricity, gas and water (0.40%) and mining and quarrying (0.24%) combined make up less than one percent (Table 9).

## **MIGRATION**

A large majority of the private household population 5 years old and over -94.49 percent of all the males and 94.54 percent of the females - resided in the same municipality where they had lived on May 1, 1975. Those who had a different place of residence on May 1, 1975 were largely migrants from other provinces, constituting 3.42 percent of all

individuals at least 5 years old, followed by transferees from another municipality of Nueva Vizcaya at 1.94 percent. Emigrants from foreign countries were the least numbered population with 0.12 percent.

The great bulk of both male and female movers inside the province and transferees from another province and abroad mostly are from rural areas (Table 10).

#### TYPE OF BUILDING

From 87.38 percent in 1970, the proportion of households occupying single houses climbed higher to 96.04 percent in 1980. Improvised houses shelter barely 1.82 percent of the total households — down by 8.45 percentage points since 1970. Duplex structures accommodate a total of 1.24 percent of all households and other collective living quarters (military camp, etc.), 0.03 percent. Households in single houses, improvised, duplex and other collective living quarters are found mostly in rural areas. Households in apartment, accesoria, row house and the like decreased slightly from 0.63 in 1970 to 0.50 percent and in commercial, industrial and agricultural buildings, from 1.08 to 0.29 percent. Hotels, lodging houses, dormitories and other housing units, respectively, shelter 0.04 and 0.02 percent while institutional buildings house 0.02 percent. Except for hotels, lodging houses, etc., most of the households in the other types of buildings crowd mainly in urban areas.

The following table shows the number and percentage of households occupying different types of buildings in the last 10 years:

TABLE F — NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, NUEVA VIZCAYA: 1970 AND 1980

	19	80	1970		
Type of Building	Number	Percent	Number	Percent	
Total	45,029	100.00	38,595	100.00	
Single house	43,244	96.04	33,724	87.38	
Duplex	558	1.24	240	0.62	
Apartment/accesoria/condominium/ row house/etc.	224	0.50	245	0.63	
Improvised (barong-barong)	818	1.82	3,963	10.27	
Commercial/industrial/agricul- tural	129	0.29	416	1.08	
Other housing unit: natural	12)	0.23	.10		
shelter, boat, etc.	11	0.02	_	_	
Hotel, lodging house, dormitory, etc.	20	0.04	_		
Institutional (hospital, convent,	10	0.02	7	0.02	
school dormitory, etc.) Other collective living quarters	15	0.03	<i>,</i>		

## TYPE OF OCCUPANCY

Majority of the households (88.31%) are owners of the dwelling units they occupy; 6.26 percent are rent-free occupants; 5.00 percent, tenant/lessee and 0.43 percent, subtenant/sublessee (Table 1).

## CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Approximately half of the total households (50.25%) inhabit dwelling units roofed with cogon/nipa, followed closely by households in units roofed with galvanized iron (47.07%). Households occupying dwelling units with roof made of other materials such as anahaw compose 1.58 percent; of makeshift/salvaged materials, 0.66 percent; of tile/concrete/brick/stone, 0.40 percent and asbestos, 0.04 percent.

Dwelling units with exterior walls of wood/plywood are occupied by 37.07 percent of the households. Houses with outer walls of bamboo/sawali are occupied by 33.88 percent; mixed tile/concrete/brick/stone and wood/plywood, 16.87 percent; other materials (anahaw, etc.), 2.83 percent; tile/concrete/brick/stone, 2.80 percent; cogon/nipa, 2.63 percent; makeshift/salvaged materials, 2.56 percent; galvanized iron/aluminum, 1.30 percent and asbestos, 0.06 percent (Table 2).

## YEAR BUILT

Newly-built dwelling units (those erected between 1976 and 1980) house more than one-third of the households (38.85%). One-fourth of the total households occupy units constructed in 1971-1975 (24.83%); 19.77 percent, 1961-1970; 10.43 percent, 1951-1960; 4.32 percent, 1942-1950 and 1.80 percent, 1941 or earlier (Table 2).

## FLOOR AREA OF DWELLING UNIT

Majority (87.44%) of the households occupy dwelling units of at most 49 square meters in floor area, wherein 58.07 percent are sheltered in units below 30 square meters and 29.37 percent, 30-49 square meters. Barely 12.56 percent live in roomier dwelling units, distributed as follows: 6.30 percent, 50-69 square meters; 3.58 percent, 70-99 square meters; 1.52 percent, 100-149 square meters; 0.58 percent, 150-199 square meters; 0.35 percent, 200-249 square meters; 0.08 percent, 250-299 square meters and 0.15 percent, 300 square meters and over (Table 3).

## TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

More than three-fourths (75.81%) of the 39,765 households which own the dwelling unit they occupy likewise own the land where the structure is erected. Merely 5.69 percent are lessee or sublessee; 4.59 percent, farm lessee/agricultural tenant of landowner and 4.21 percent, of other legal tenure. Those with no tenure (squatter, etc.) make up 9.70 percent (Table 4).

#### KIND OF LIGHTING FACILITIES

Kerosene is still the most common type of lighting facility used, with 78.87 percent of the total households using it, compared to 88.70 percent in 1970. Electricity comes next

with 12.03 percent, nearly twice the proportion of households using it in the last decade (6.90%). Liquefied petroleum gas (LPG) fuel the lights of 0.96 percent households; only 0.04 percent use oil and 8.10 percent, other kinds. Kerosene is widely used in rural areas (86.39% of all kerosene users) while among users of electricity, 54.29 percent are urban and 45.71 percent, rural households (Table 5)

## SOURCE AND USE OF WATER SUPPLY

The two top sources of water for drinking and kitchen use are the tubed/piped shallow well and spring. About 45.45 percent of the households depend on the former for drinking; 45.73 percent, for kitchen use and 38.25 percent, for washing clothes. The corresponding proportions of households utilizing water from springs are 22.15 percent, 22.49 percent, and 14.33 percent.

Other sources of water for drinking are dug well, 11.21 percent; tubed/piped deep well, 10.10 percent; faucet, community water system, 9.20 percent; and lake, river, stream, etc. 1.87 percent. Ten households or merely 0.02 percent drink rain water. For kitchen use, Nueva Vizcaya households depend on the same sources distributed as follows: 10.05 percent, dug well; 9.85 percent, tubed/piped deep well; 8.17 percent, faucet, community water system and 3.70 percent, lake, river, stream, etc. For washing clothes, however, almost one-third of the households (30.10%) use water from a lake, river, stream, etc.; 6.73 percent use the faucet, community water system; 6.69 percent, tubed/piped deep well; 3.85 percent, dug well and only 0.05 percent, rain (Table 6).

## **COOKING FUEL**

A great majority of the households in Nueva Vizcaya cook with wood or charcoal, although the proportion has declined from 95.03 percent in 1970 to 88.21 percent in 1980. Nine out of ten households (90.03%) in the rural and eight out of ten (80.15%) in the urban areas cook with wood or charcoal. A similar pattern was observed in 1970 with 97.48 percent for the rural and 86.32 percent for the urban households. Kerosene ranks next with 6.67 percent of the total households; liquefied petroleum gas (LPG), 3.48 percent; electricity, 0.52 percent; and other fuel, 1.12 percent (Table 8). In 1970 only 2.40 percent used kerosene and 2.23 percent, LPG.

## **TOILET FACILITIES**

By type of toilet facility, more than one-third of the total households in the province use water-sealed with other depository (39.04%); 26.98 percent, open pit; 16.06 percent, water-sealed with sewer/septic tank and 14.49 percent, closed pit (antipolo, etc.). Very few (0.47%) use other types (pail system, etc.) while 2.96 percent have no toilet facilities. Urban households are apparently on the way to switching to modern toilet facilities with more than two-fifths using water-sealed with other depository (46.19%) and 38.52 percent, water-sealed with sewer/septic tank. Only 9.33 percent use closed pit; 5.42 percent, open pit and 0.18 percent, other. Rural households have likewise improved with 37.42 percent using water-sealed with other depository; 31.85 percent, open pit; 15.65 percent, closed pit; 11.00 percent, water-sealed with sewer/septic tank and 0.54 percent, other types. Households without toilet facilities constitute 0.36 percent in the urban and 3.54 percent in the rural areas (Table 7).

## OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Far from being extensively owned, the radio is found only in 61.61 percent of all the households. Approximately 5.47 percent own a television set and 4.53 percent, refrigerator or freezer. More urban dwellers own these appliances than rural dwellers. Nearly three-fourths (73.48%) of the urban households own radios; 16.23 percent, television set and 14.39 percent, refrigerator or freezer. The corresponding percentages for the rural households are 58.93 percent for radio owners; 3.04 percent, television set and 2.31 percent, refrigerator or freezer (Table 9).

#### A BRIEF ANALYSIS

with 12.03 percent, nearly twice the proportion of households using it in the last decade (6.90%). Liquefied petroleum gas (LPG) fuel the lights of 0.96 percent households; only 0.04 percent use oil and 8.10 percent, other kinds. Kerosene is widely used in rural areas (86.39% of all kerosene users) while among users of electricity, 54.29 percent are urban and 45.71 percent, rural households (Table 5)

#### SOURCE AND USE OF WATER SUPPLY

The two top sources of water for drinking and kitchen use are the tubed/piped shallow well and spring. About 45.45 percent of the households depend on the former for drinking; 45.73 percent, for kitchen use and 38.25 percent, for washing clothes. The corresponding proportions of households utilizing water from springs are 22.15 percent, 22.49 percent, and 14.33 percent.

Other sources of water for drinking are dug well, 11.21 percent; tubed/piped deep well, 10.10 percent; faucet, community water system, 9.20 percent; and lake, river, stream, etc. 1.87 percent. Ten households or merely 0.02 percent drink rain water. For kitchen use, Nueva Vizcaya households depend on the same sources distributed as follows: 10.05 percent, dug well; 9.85 percent, tubed/piped deep well; 8.17 percent, faucet, community water system and 3.70 percent, lake, river, stream, etc. For washing clothes, however, almost one-third of the households (30.10%) use water from a lake, river, stream, etc.; 6.73 percent use the faucet, community water system; 6.69 percent, tubed/piped deep well; 3.85 percent, dug well and only 0.05 percent, rain (Table 6).

#### **COOKING FUEL**

A great majority of the households in Nueva Vizcaya cook with wood or charcoal, although the proportion has declined from 95.03 percent in 1970 to 88.21 percent in 1980. Nine out of ten households (90.03%) in the rural and eight out of ten (80.15%) in the urban areas cook with wood or charcoal. A similar pattern was observed in 1970 with 97.48 percent for the rural and 86.32 percent for the urban households. Kerosene ranks next with 6.67 percent of the total households; liquefied petroleum gas (LPG), 3.48 percent; electricity, 0.52 percent; and other fuel, 1.12 percent (Table 8). In 1970 only 2.40 percent used kerosene and 2.23 percent, LPG.

#### **TOILET FACILITIES**

By type of toilet facility, more than one-third of the total households in the province use water-sealed with other depository (39.04%); 26.98 percent, open pit; 16.06 percent, water-sealed with sewer/septic tank and 14.49 percent, closed pit (antipolo, etc.). Very few (0.47%) use other types (pail system, etc.) while 2.96 percent have no toilet facilities. Urban households are apparently on the way to switching to modern toilet facilities with more than two-fifths using water-sealed with other depository (46.19%) and 38.52 percent, water-sealed with sewer/septic tank. Only 9.33 percent use closed pit; 5.42 percent, open pit and 0.18 percent, other. Rural households have likewise improved with 37.42 percent using water-sealed with other depository; 31.85 percent, open pit; 15.65 percent, closed pit; 11.00 percent, water-sealed with sewer/septic tank and 0.54 percent, other types. Households without toilet facilities constitute 0.36 percent in the urban and 3.54 percent in the rural areas (Table 7).
